RELEVANT EXPERIENCE

Consulting Data Analyst & Data Engineer

The Information Lab

February 2023 – Ongoing | London, UK

- Undertook a 4 month intensive data analytics training program with one of the UK's top data analytics consultancies, followed by 3 years of consulting work across various industries. This period involved developing advanced technical skills in Snowflake, GCP, Azure, dbt, Tableau, and Alteryx. Also honed were skills in managing clients and stakeholders, along with cultivating a high standard in presentation abilities.

Data Engineer

Virgin Media O2

August 2025-Ongoing | London, UK

- Designed and developed a pioneering pipeline linking network performance data with customer metrics, enabling end-to-end measurement of a £700m infrastructure investment's impact on performance, satisfaction, churn, and revenue.

GCP | SQL | dbt | Jira | Gitlab

Data Engineer

Prêt a Manger

November 2024 – June 2025 | London, UK

- Engineered robust ETL pipelines in Snowflake to process complex live order data from hundreds of shops across 5 countries. Developed custom SQL and JSON unnesting scripts to transform messy transactional data into structured insights on revenue, stock, tax, and waste.
- Led a core component of the company's migration from a legacy SQL Server system to Snowflake, contributing to multi-million-pound savings in infrastructure and licensing costs.
- Re-engineered the broken "Active Till" report to identify underused and overused tills, automating its data pipeline and reducing reporting time by over 80

Snowflake | SQL | Github | Javascript | Jira | GCP | Azure

Data Analyst

BAE Systems

June 2023 – June 2024 | London, UK

- Scoped, built, and automated a key financial report to track the company's R&D budget and spending using chained Alteryx apps, and delivered an interactive Tableau dashboard securely accessible on Tableau Server.
- Built a Tableau dashboard to identify multimillion-pound technology investments, highlighting new opportunities and tracking the progress of prior initiatives.

Tableau Suite | Alteryx Suite | Jira

EDUCATION

Master of Geographic Data Science

London School of Economics (LSE)

2021 – 2022 | London, UK

- Studied reinforcement learning, environmental economics, GIS and spatial data analysis
- Answered causal research questions and developed rigorous scientific methods

PERSONAL STATEMENT

Analytics Engineer with three years of consulting experience designing and delivering client-focused data solutions across a wide range of industries. Strong emphasis on collaboration, client management, and stakeholder engagement, combined with solid technical expertise in Snowflake, dbt, Tableau, and Alteryx. Particularly motivated by using data expertise to drive environmental sustainability and support the energy transition.

CERTIFICATIONS

- Tableau Data Analyst
- SnowPro Core
- Alteryx Designer Advanced
